

MAIN FEATURES

- 90 264 V_{AC} Universal input voltage range
- 400 W rated power (440 W peak)
- Extremely high efficiency (94% typical)
- Low stand-by consumption (<0.5 W)
- 12, 24, 28, 36 or 48V standard output variants
- Active PFC, EN61000-3-2 compliant (Class C)
- Low earth leakage current
- Fan speed control circuit (off at <50 W load)
- Over temperature protection
- OV, OC, and short circuit protections
- +5 V Stand-by, 2 A output
- 12 V Auxiliary, 1 A output
- Remote On/Off and power good signals
- U-chassis and boxed packages fit 1U applications.
- ANSI/AAMI ES60601-1 3rd ed. compliant
 IEC/EN 60601-1 3rd ed. compliant
- RoHS 3 compliant (EU directive 2015/863)
- 4000 m altitude operation

DESCRIPTION

The MDP400 series of medical AC-DC power supplies feature a compact form factor, high conversion efficiency and 2x MoPP means of protection grade.

The series provides a steady 400 W of regulated DC power through the full 90 to 264 V_{AC} input voltage range. Based on an open frame, 3.00" x 6.50" x 1.46" form factor, the series is available in five different low-profile packages to enable designers to integrate into 1U applications.

By converting energy at 94% typical efficiency, the MDP400 series generates less heat facilitating thermal management in space constrained systems and offering high reliability.

The MDP series is available in five standard output voltages: 12, 24, 28, 36, 48 V_{DC} , offer an auxiliary 12 V_{DC} and 5 V_{DC} stand-by outputs. Available control signals include Power Good (P_OK), Remote On/Off (PS_ON) and (+) remote sense compensation.

Boxed and vented open frame models can deliver full output power up to 50 °C, can operate up to 70 °C with de-rating and are capable of start up from –30 °C.

A built-in fan speed control circuit in the boxed packages assures proper forced air cooling, minimizing operational noise and enhancing useful life time.

The MDP400 series complies with the 3rd edition of the IEC 60601-1 safety standard for medical equipment, offers 2xMoPP means of patient protection and is suitable for BF rated applied parts.

The MDP400 series meets the EN 60601-1-2 EMC limits of Class B for conducted and radiated emissions as well as the IEC/EN61000-3, for harmonic and flicker, and IEC/EN 60601-1-2 4th edition for EMC immunity standards.

MARKET SEGMENTS AND APPLICATIONS

- Diagnostic equipment
- Imaging equipment
- Respiratory devices

- Therapy appliances
- Dental equipment

¹ The combined output power of V1, V2 and 5V_{SB} for "-OF", "-UC" and "-PC" packages, must not exceed 400 W when cooled by 400 LFM air flow, and 250 W when natural convection cooled, up to 50 °C. Above 50 °C output de-rating applies. See de-rating curves below. In any case, the heat sink maximum temperature should not exceed +110 °C at 50 °C ambient temperature.
