MCB600 SERIES

MAIN FEATURES

- Universal input voltage range (85 264 V_{AC})
- Active PFC, EN 61000-3-2 compliant
- Input surge current limiting (<20A)
- High power density (23W/in³)
- Steady 600W output power available in a 3x5x1.6" form factor
- Fan speed control function for quiet operation
- Four (4) slots configurable for up to eight (8) outputs
- Output modules series and parallel operation
- Accurate wired current share among paralleled modules
- Remote output voltage programming / control
- Remote output current programming / control
- Output current monitoring signal
- +/- sense terminal for each slot
- Output modules +5V, 10mA bias supply
- Remote single slot or simultaneous inhibit signals
- Power chassis +5V, 200mA bias supply
- AC good signal
- Power good signal for each slot
- Over temperature, OV, OC and SC protections
- Medical IEC 60601-1 edition 3.1 compliance
- 2x MoPP primary-to-secondary protection grade.
- EN55011, EN 60601-1-2, Class B, conducted radiated emissions.
- RoHS 3 compliant (Directive EU 2015/863)

DESCRIPTION

The MCB600 series of medical rated modular and configurable AC-DC power supplies provide high performance and wide flexibility in an extremely compact package. The series is capable of a steady 600W from a 3 x 5 x 1.6" package, distributed among four independent and isolated slots where any of the six available output modules may be plugged.

The output modules are rated for 150W and are available in single nominal output voltages of 5, 12, 24 and 48V, and two double nominal output voltages of 12 and 24V. Thanks to their extremely wide output voltage adjustability range and the possibility to connect modules of the same type in series and parallel, the MCB600 offers an unrivalled flexibility.

Advanced functions such as remote output current / voltage control and programming, single slot inhibit and all slots inhibit make the MCB600 interactive with complex medical equipment.

Other available signals include power supply AC-Good and output modules Power-Good and +/- Sense Terminals.

The MCB600 comes in a closed package with a built-in speed-controlled fan to ensure the required airflow while maintaining minimal operational noise, which ultimately enhances the power supply service life time.

Output modules of the same type can be connected in parallel in any number in the same chassis without any OR-ing protection. Paralleling modules across multiple chassis does require OR-ing protection with FET or Diodes. This is also true when operating modules in a N+1 redundant configuration.

Protection features include a fuse on AC lines, input under voltage lockout (IUV), output over-current (OC), output short-circuit (SC), output over-voltage (OV) and over-temperature (OT).

The MCB600 series complies with the 3.1 edition of the IEC 60601-1 safety standard for medical equipment. It offers 2x MoPP means of patient protection and can be used in non-patient contact and non-patient critical equipment.

The MCB600 also complies with the EN55011 EMC Class B limits for conducted and radiated emissions, with the IEC/EN 61000-3, for harmonics, the IEC/EN 61000-4 and IEC/EN 60601-1-2 4th edition for EMC immunity.

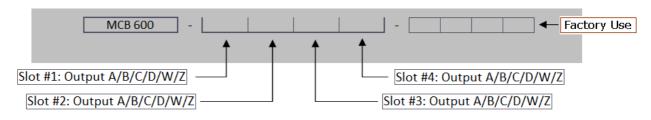

MARKET SEGMENTS AND APPLICATIONS

- Electromagnetic medical equipment
- Medical / aesthetical laser applications

- Laboratory analyser equipment
- Dental care equipment

MODEL CODING AND OUTPUT AND RATINGS

Use "0" for unused slots. A slot cover bracket will be fitted at factory

The factory might issue a 4 digit code for a specific configuration which can be used for next and future orders of the same configuration. When ordering an input with no output inserted, simply order "MCB600-XXXX" (Power chassis).

Output Module	Nominal Voltage	Voltage Adjustment	Output Rated Power	Rated Current	Max Current at Nom Voltage	Load Regulation	Over Voltage trip level
Α	5 V _{DC}	1.5 to 7.5 V _{DC}	125 W	25.0 A	25 A	±50 mV	9.5 V
В	$12 V_{DC}$	4.5 to 15 V_{DC}	150 W	15.0 A	12.5 A	±100 mV	18 V
С	$24 V_{DC}$	9 to 30 V_{DC}	150 W	7.5 A	6.25 A	±150 mV	36 V
