#### **RCB600 SERIES**

#### **MAIN FEATURES**

- Universal input voltage range (85 264 V<sub>AC</sub>)
- Active PFC, EN 61000-3-2 compliant
- Input surge current limiting (<20 A)</li>
- High power density (23 W/in³)
- Steady 600 W output power available in a 3 x 5 x 1.6" form factor
- Fan speed control function for guiet operation
- Four (4) slots configurable for up to eight (8) outputs
- Output modules series and parallel operation
- Accurate wired current share among paralleled modules
- Remote output voltage programming / control
- Remote output current programming / control
- Output current monitoring signal
- +/- sense terminal for each slot
- Output modules +5V, 10mA bias supply
- Remote single slot or simultaneous inhibit signals
- Power chassis +5V, 200mA bias supply
- AC good signal
- Power good signal for each slot
- Over temperature, OV, OC and SC protections
- EN55011, EN55032 Class B, conducted radiated emissions.
- RoHS 3 compliant (Directive EU 2015/863)

#### **DESCRIPTION**

The RCB600 series of modular and configurable AC-DC power supplies provide high performance and wide flexibility in an extremely compact package. The series is capable of a steady 600W from a 3 x 5 x 1.6" package, distributed among four independent and isolated slots where any of the six available output modules may be plugged.

The output modules are rated for 150W and are available in single nominal output voltages of 5, 12, 24 and 48V, and two double nominal output voltages of 12 and 24V. Thanks to their extremely wide output voltage adjustability range and the possibility to connect modules of the same type in series and parallel, the RCB600 offers an unrivalled flexibility.

Advanced functions such as remote output current / voltage control and programming, single slot inhibit and all slots inhibit make the RCB600 interactive with complex industrial and automation systems.

Other available signals include power supply AC-Good and output modules Power-Good and +/- Sense Terminals.

The RCB600 comes in a closed package with a built-in speed-controlled fan to ensure the required airflow while maintaining minimal operational noise, which ultimately enhances the power supply service life time.

Output modules of the same type can be connected in parallel in any number in the same chassis without any OR-ing protection. Paralleling modules across multiple chassis does require OR-ing protection with FET or Diodes. This is also true when operating modules in a N+1 redundant configuration.

Protection features include a fuse on AC lines, input under voltage lockout (IUV), output over-current (OC), output short-circuit (SC), output over-voltage (OV) and over-temperature (OT).

The RCB600 series complies with IEC/EN/UL/CSA 60950-1 and 62368-1 safety standards for Audio Video and IT equipment. It also complies with the Class B limits of the standards EN55011, EN55032 for conducted and radiated emissions, IEC/EN 61000-3 Class A for harmonic content and IEC/EN 61000-4 for EMC immunity.

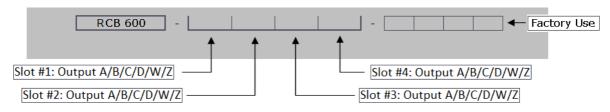

#### MARKET SEGMENTS AND APPLICATIONS

- Industrial Process Control and Automation
- Telecommunications

- Laboratory / Analysis Equipment
- Test and Measurement Equipment

#### MODEL CODING AND OUTPUT AND RATINGS

Use "0" for unused slots. A slot cover bracket will be fitted at factory

The factory might issue a 4 digit-code for a specific configuration which can be used for next and future orders of the same configuration. When ordering an input with no output inserted, simply order "RCB600-XXXX" (Power chassis).

Output Module	Nominal Voltage	Voltage Adjustment	Output Rated Power	Rated Current	Max Current at Nom Voltage	Load Regulation	Over Voltage trip level
Α	5 V <sub>DC</sub>	1.5 to 7.5 V <sub>DC</sub>	125 W	25.0 A	25 A	±50 mV	9.5 V
В	$12 V_{DC}$	$4.5$ to $15$ $V_{DC}$	150 W	15.0 A	12.5 A	±100 mV	18 V
С	$24 V_{DC}$	$9 \text{ to } 30 \text{ V}_{DC}$	150 W	7.5 A	6.25 A	±150 mV	36 V
D	$48 V_{DC}$	18 to 58 V <sub>DC</sub>	150 W	3.75 A	3.13 A	±300 mV	66 V
W	$2x 12 V_{DC}$	$3.3$ to $15$ $V_{DC}$	2x 75 W	5.0 A	5.0 A	±50 mV	20 V
Z	$2x 24 V_{DC}$	15 to 38 V <sub>DC</sub>	2x 75 W	3.125 A	3.125 A	±150 mV	44 V
0 (Zero)		Metal blank	ing plate for unused	slots			

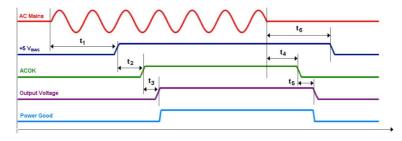

#### **INPUT SPECIFICATIONS**

Parameter	Details	Min	Тур	Max	Units
AC input voltage	Nominal range is 100 to 240 V <sub>RMS</sub>	85		264	$V_{RMS}$
AC input frequency		47	50/60	63	Hz
DC input voltage		120		300	$V_{DC}$
Power rating	De-rate by $0.83\%/V_{RMS}$ below $120 V_{RMS}$ (600 W at $120 V_{RMS}$ , $450 W$ at $90 V_{RMS}$ )			600	W
Input current	At 600 W output and 120 V <sub>RMS</sub> input			6	Α
Inrush current (peak)	265 V <sub>RMS</sub> , cold start			20	Α
Fusing	5 x 20 fast acting fuse			8	Α
Input current limit	Maintains power factor		8		Α
Efficiency	Configuration dependent		86	89	%
Idle power	All outputs fitted and enabled		28		W
idle power	All outputs fitted and disabled		21		VV
Power factor	Typical value at 300 W output at 240 V <sub>RMS</sub>		0.96	0.99	
Hold up	600 W output at 120 V <sub>RMS</sub> input	17	20	21	ms
UVLO	Turn on only	78		84	$V_{RMS}$
Over temperature	Internally monitored. Latching	115		125	°C
Reliability	At 40 °C, 80% load			2	FPMH

### **SIGNALS / CONTROLS AND TIMING**

Parameter	Details	Min	Тур	Max	Units
Bias voltage	<del>-</del>	4.8	5	5.2	V
Bias current		0		200	mA
Power Good Voltage	PNP open collector with internal 10 $k\Omega$ pull down resistor	8	10	15	V
<b>Power Good Current</b>		0		20	mA
Individual inhibit voltage	Apply ≥ 5 V when used as Global Inhibit	2		15	V
Inhibit current	10 kΩ input impedance	0.2		1.5	mA
Global inhibit voltage		3		15	V
Global inhibit current	5 kΩ input impedance	0.6		3	mA
AC_OK voltage		1		4	V
AC_OK current		-10		20	mA
AC_OK warning	See user manual for exceptions	5			ms

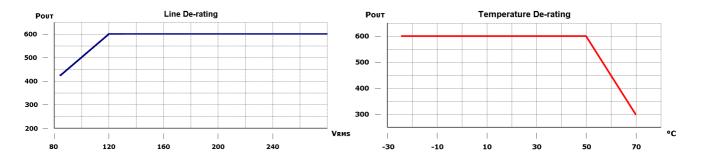

AC Mains asserted – +5V <sub>BIAS</sub> supply effective	e: t1 = 300 ms	AC Mains de-asserted – ACOK signal Off:	t4 = 15 ms
AC Mains asserted – ACOK signal On:	t1 + t2 = 350  ms	AC Mains de-asserted – Power-Good low:	t4 + t5 = 20  ms
AC Mains asserted – Power-Good high:	t1 + t2 + t3 = 325 ms	AC Mains de-asserted – +5V <sub>BIAS</sub> supply Off:	t6 = 100 ms

### **ENVIRONMENTAL, INSTALLATION AND RELIABILITY**
